

# The Monarch Research Project

An organization like no other's that really cares about the future of the Monarch butterflies without relying on any lab work or studies to implement their practices.

Real people doing their best to educate others on how to best help the steady declining Monarch population.

They are based in Marion Iowa: <https://monarchresearch.org>

Go through their web pages and enjoy their work.

Don't miss to watch their recorded seminar on YouTube: <https://youtu.be/p4uKJRAEisw>  
a simple presentation where every scientists and citizen scientists can learn from.

## Our Vision

The Vision of Monarch Research is a vibrant, thriving pollinator habitat throughout Linn County with a sustainable growing monarch population.

Scroll to the bottom of their Home page to read these important testimonials

"The Monarch Research Project is a prime example of an 'all-hands-on-deck' approach. Thank you for having the energy and vision required for saving the monarch butterfly."

- KRAIG MCPEEK, U.S. FISH AND WILDLIFE SERVICE

"What you are doing is audacious in the best sense of the word: You're trying something difficult, and you're doing it for good reasons."

- DAN FAGIN, PULITZER PRIZE-WINNING ENVIRONMENTAL WRITER

MORE BELOW

"As a first-time participant, I'd like to let you know how much I've enjoyed the project. What a kick to watch the caterpillars devour the milkweed! I released 29 butterflies, and my only complaint is that it went too fast."

- CAROL FRANKLIN, A COMMUNITY MEMBER

"MRP's strategy for solving the decrease in native habitat and the dramatic reduction in the monarch population is to engage and energize a broad group of Linn County landowners to make environmentally sound use of our lands. Our hope is that our efforts set an example of the positive impact we all can have on the environment."

"MRP's strategy for solving the decrease in native habitat and the dramatic reduction in the monarch population is to engage and energize a broad group of Linn County landowners to make environmentally sound use of our lands. Our hope is that our efforts set an example of the positive impact we all can have on the environment."

- CHUCK HAMMOND, PRESIDENT AND CEO, RAINING ROSE

**The work we're all doing is no different, and therefore we shall continue in our efforts.**
